Serving Williston and within about 45 minutes across five counties.

Planning a Bathroom Remodel?

There's a lot packed into a bathroom remodel. Tile, plumbing, fixtures, lighting, cabinetry, and waterproofing all have to come together in a relatively small space. Here's how we plan it, build it, and a few things you might not expect along the way.

WHAT TO EXPECT WHEN REMODELING YOUR BATHROOM WITH US

1

The First Conversation

We walk the space with you and talk through what you're picturing, how the bathroom works for you today, and what you'd like it to do differently. Storage, shower space, and layout all come into that conversation. From there, we give you a realistic investment range so you can start planning with real numbers.

2

Pre-Construction

Tub, shower, tile, vanity, fixtures, lighting, and the full scope come together during this phase. We work through the design and selections with you, including the plumbing, waterproofing, and layout details behind them. By the end, you have a firm price and a clear plan for the build.

3

Ordering

Vanities, tile, fixtures, and other materials are ordered around their individual lead times, with custom items ordered early. We coordinate quantities and timing with the vendors supplying your project so the right materials are here when the work calls for them.

4

The Build

Our own crew carries the work from framing through tile, with the same TS team overseeing the project from start to finish. Our crew handles the tilework in-house, including the careful layout and waterproofing that happen before the first tile goes up. You'll follow the progress through your client portal, with check-ins at key milestones through the final walkthrough.

5

When the Walls Open Up

Once demolition begins, we get our first full look at what's been happening behind the walls. If something needs attention, we'll show you what we found, explain what it means for the project, and talk through the next step with you.

6

The Finishing Touches

Some of the final details can only happen once the work before them is complete. Custom shower glass, for example, is measured to the finished opening after the tile is in. Then mirrors, hardware, and the remaining details bring the room together.

7

After Completion

Every project is backed by a one-year workmanship warranty. If something isn't performing the way it should, we come back and make it right. And years after the project is finished, you can still call us.

Tell us what you have in mind. We'll come see the space, talk through the possibilities, and give you a realistic place to start.
