Serving Williston and within about 45 minutes across five counties.

Planning a Deck or Porch?

Some of the best moments in Vermont happen outside. A deck or porch gives you more ways to enjoy the seasons, whether that means a quiet place to sit, room to gather, or a little shelter from the weather. Here's how we plan and build an outdoor space around the way you want to use it.

WHAT TO EXPECT WHEN BUILDING YOUR DECK OR PORCH WITH US

1

The First Conversation

We start with what you want the space to do and how you plan to use it. We'll walk the property with you, look at how the space connects to the house and yard, and talk through size, coverage, access, and the features you have in mind. From there, we'll give you a realistic investment range to start planning with.

2

Pre-Construction

This is where the size, layout, structure, and details get worked out. We plan how the new space connects to the house, complete structural engineering and permitting, and finalize materials and selections. By the end, you have a firm price and a clear plan for construction.

3

Built for Vermont Weather

Vermont weather is part of the planning. Footings need to extend below frost depth, structures need to carry snow loads, and materials need to handle years of sun, rain, snow, and temperature swings. We think about how each part will perform through the seasons, along with how it looks.

4

The Build

Our own crew handles the carpentry, from the structure to decking, railings, screens, and finish work. When the project includes lighting, electrical, plumbing, or other specialty work, we coordinate the trusted trades needed to bring it all together.

5

Communication

You'll have a clear point of contact throughout the build, and your client portal keeps the schedule, selections, photos, and progress together in one place, so you always know where things stand.

6

The Finishing Touches

As railings, screens, lighting, trim, and final details go in, the space comes together. We finish with a walkthrough, go over the completed work with you, and take care of anything that needs attention before calling it done.

7

After Completion

Every project is backed by a one-year workmanship warranty. If something isn't performing the way it should, we come back and make it right. And years after the project is finished, you can still call us.

Tell us what you have in mind. We'll walk the space with you and talk through what's possible outside.
