Serving Williston and within about 45 minutes across five counties.

Planning a Kitchen Remodel?

A kitchen remodel has a lot of moving pieces, and most of them are worked out before construction begins. From planning and selections to ordering and the build itself, here's what goes into the process and a few things you might not expect along the way.

WHAT TO EXPECT WHEN REMODELING YOUR KITCHEN WITH US

1

The First Conversation

We walk the space with you and talk through what you're picturing, how you use the kitchen today, and what you'd like it to do differently. Storage, cooking, and gathering all come into that conversation. From there, we give you a realistic investment range so you can start planning with real numbers.

2

Pre-Construction

Cabinetry, appliances, lighting, materials, layout, and the full scope come together during this phase. We work through the design and selections with you, including the details that shape how the kitchen works day to day. By the end, you have a firm price and a clear plan for the build.

3

Ordering

Cabinetry is ordered first because it carries the longest lead time, sometimes six to ten weeks for custom or semi-custom orders. We coordinate timing with the vendors supplying your project so materials are lined up with the schedule, while countertops are measured once the cabinets are in place.

4

The Build

Our own crew carries the work from framing through tile, with the same TS team overseeing the project from start to finish. You'll follow the progress through your client portal, with updates and check-ins at key milestones from demo through the final walkthrough.

5

Living Without a Kitchen

We'll plan for daily life during construction well before it starts. Depending on your project, that might mean a temporary sink, a grill setup, or a small temporary kitchen onsite. We'll talk through what makes sense for your household before the kitchen comes apart.

6

The Finishing Touches

This is when all those decisions made during pre-construction come together. Hardware goes on, lighting is installed, appliances settle into place, and the kitchen starts to feel complete.

7

After Completion

Every project is backed by a one-year workmanship warranty. If something isn't performing the way it should, we come back and make it right. And years after the project is finished, you can still call us.

Tell us what you have in mind. We'll come see the space, talk through the possibilities, and give you a realistic place to start.
