Serving Williston and within about 45 minutes across five counties.

Renovating Your Whole Home?

Renovating several spaces at once takes a different level of planning and coordination. Decisions in one area can affect another, so the details need to come together under one plan. Here's how we carry a project like this to completion.

WHAT TO EXPECT WHEN RENOVATING YOUR HOME WITH US

1

The First Conversation

We walk the home with you and talk through what's working, what isn't, and what you'd like to change. We want to understand how you live in the space, what matters most to you, and what you hope to accomplish. From there, we give you a realistic investment range so you can start planning with real numbers.

2

Pre-Construction

Design, plans, selections, and the full scope are developed during this phase. With several spaces involved, we also look at how layouts connect, materials carry through, and each space keeps its own character while feeling cohesive as a whole. By the end, you have a firm price and a clear plan for construction.

3

Coordination

A project of this scale can involve a lot of selections, showrooms, vendors, and moving pieces. How involved we are depends on your level of pre-construction support. Either way, we coordinate with people who know how we work, understand the project, and know the level of detail we expect.

4

Living Through the Renovation

A whole-home renovation can mean living alongside construction or moving out for a while. We'll plan around what works for you, from preparing the site with daily life in mind to increasing updates when you won't be there to see the progress firsthand.

5

The Build

Our own crew carries the work from framing through finishes, with the same TS team overseeing the project from start to finish. We coordinate the schedule, trades, materials, and details across the project, while you follow the progress through your client portal with regular updates and check-ins.

6

The Finishing Touches

This is when the decisions made during pre-construction start showing up together. Hardware goes on, lighting is installed, and details carry throughout the home. We finish with a walkthrough together, handling what needs attention before calling it done.

7

After Completion

Every project is backed by a one-year workmanship warranty. If something isn't performing the way it should, we come back and make it right. And years after the project is finished, you can still call us.

Tell us what you have in mind. We'll come see the space, talk through the possibilities, and give you a realistic place to start.
